PRINT WITH MORE CONFIDENCE

As education institutions adjust to new blended learning environments, Canon Solutions America offers you peace of mind with choices to help minimize touch points and reduce the risk of spreading germs when using your communal print/copy/scan devices. You can access your multifunction devices (MFDs) from smartphones or tablets, use simple accessories to operate the touch screen, and follow our key tips for proper device cleaning.

REMOTE OPERATION

Access the printer control panel remotely - Print, copy, and scan from your smart device

Download and install the Canon PRINT Business App from Google Play™ or the App Store® and use it to access the features of your imageRUNNER ADVANCE or imagePRESS Lite C165 device from your smartphone or tablet. Connect to the device via IP address, QR code, or an optional NFC or Bluetooth connection.

- Print from your mobile device and supported cloud storage locations such as Dropbox™ and Google Drive™.
- Copy documents without touching the MFP control panel.
- Scan and send documents to your mobile device and store in supported cloud storage locations.

Secure Printing – Release print jobs from your mobile device

The uniFLOW Mobile App allows you to scan the QR code on your imageRUNNER ADVANCE, imagePRESS Lite C165, or imageCLASS device for authentication. Once you log in, you can release print jobs and update print settings via your mobile device. The app also lets you:

- Customize your default screen.
- Set commonly used printers.
- Pre-select finishing options.

The uniFLOW Mobile App is available for Canon and non-Canon devices supported by uniFLOW LTS (on-premise) and uniFLOW ONE (hybrid).

SMART CHANGE STARTS HERE.

AUXILIARY TOOLS

Reduce Touch Points with Simple Accessories

Most Canon multifunctional devices and printers feature resistive touchscreens that are responsive to most types of styluses as well as other types of auxiliary tools.

- Equip users with a personal stylus to operate touchscreens—passive or capacitive styluses as well as resin-tipped resistive styluses are supported.

- For a one-time use, alternative, cotton swabs can be used on most Canon touchscreens.

Latex gloves can be worn during operation for those environments where personal protective equipment is common.

PROTECTIVE FILM

Add Control Panel Covers To Help Protect Your Device When Cleaning

Thin vinyl control panel covers cling to the touch panel for easy installation and removal without leaving any sticky adhesive residue. Custom-made for imageRUNNER ADVANCE DX and Third Generation models, these covers protect against cleaning liquids entering the control panel to help reduce maintenance visits and support maximum uptime.

DEVICE CLEANING

Best Practices for Maintaining Your Equipment

Regularly clean all areas of your multifunction devices that may be touched by users, including control panels, covers, and jam locations, as well as areas that may be touched when routinely changing out paper and toner supplies. Here are some key tips to guide you:

- Make sure the device is powered down and unplugged before cleaning.

- Do not spray cleaning solution directly on the device or user interface touch panel.

- Use a lint-free or microfiber cloth sprayed with a 70%-plus solution of isopropyl alcohol.

- Use only glass cleaner on the scan glass of the device.

- Use disposable gloves when cleaning.

- Wash hands regularly and avoid touching your face or mouth after using all office equipment in work environments.

Visit **csa.canon.com/EDU-Print-With-Confidence** for more details, documentation, and video material.

We encourage you to work with your Canon Solutions America representative to identify best practices and simplify integration when using these tools. Canon Solutions America is committed to employee safety and information security.
